

Social Media Website Clone

About the project

A social media website is a project that is very similar to the Instagram website and uses the Python Django framework. Users may create accounts on these websites, like their friends' posts, comment on them, and get recommendations for other users to follow. The website also has a search function so that users can seek other users and view their profiles.

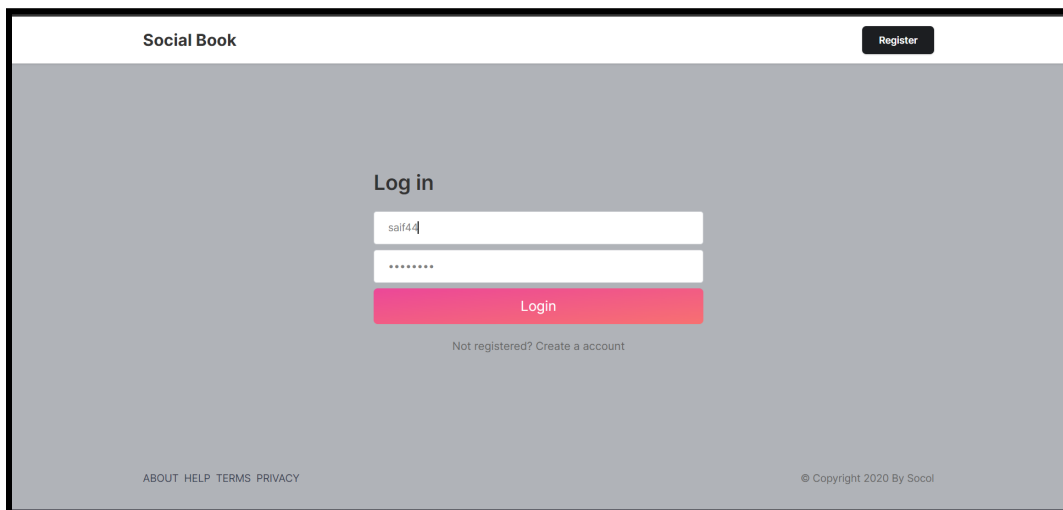

Website GUI

1. Sign Up page

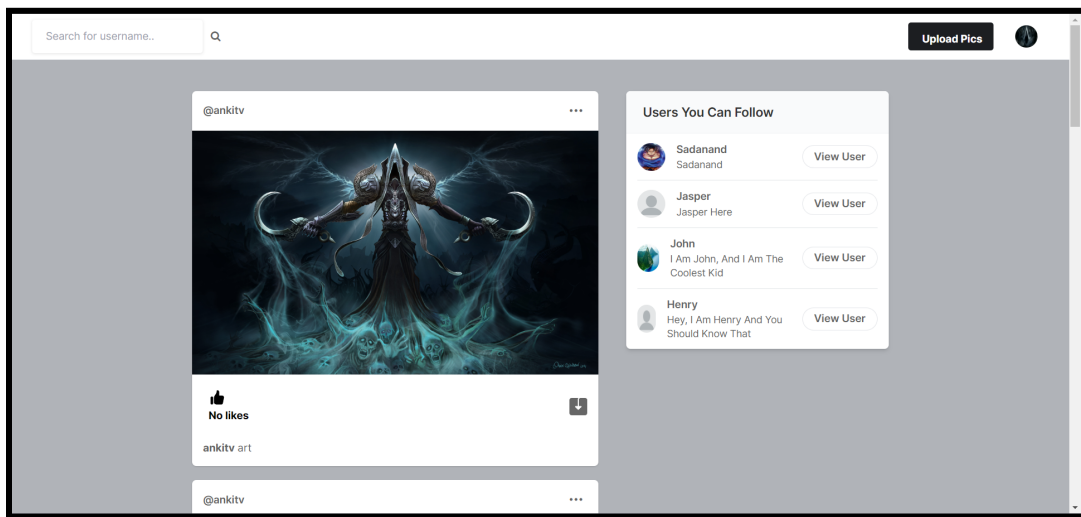

The Sign Up page features a header with 'Social Book' on the left and a 'Login' button on the right. The main content area is titled 'Sign Up' and contains four input fields: a username field with 'sharwin99', an email field with 'sharwin.h@atriauniversity.edu.in', a password field with '*****', and a confirm password field with '*****|'. Below these fields is a pink 'Sign Up' button. A link 'Do you have an account? Login' is positioned below the button. The footer includes links 'ABOUT', 'HELP', 'TERMS', and 'PRIVACY' on the left, and a copyright notice '© Copyright 2020 By Socol' on the right.

2. Sign In page

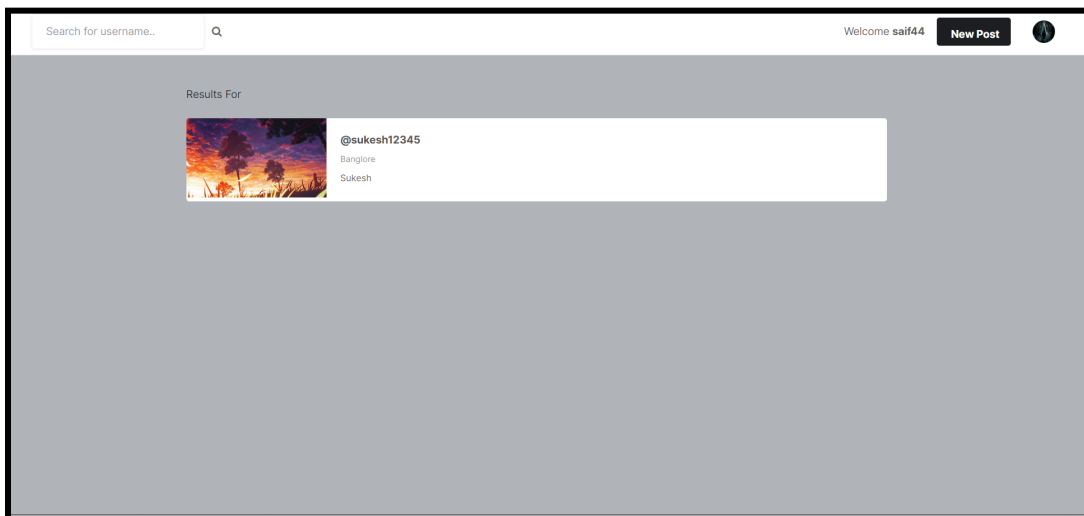

The Sign In page features a header with 'Social Book' on the left and a 'Register' button on the right. The main content area is titled 'Log in' and contains two input fields: a username field with 'sal144' and a password field with '*****'. Below these fields is a pink 'Login' button. A link 'Not registered? Create a account' is positioned below the button. The footer includes links 'ABOUT', 'HELP', 'TERMS', and 'PRIVACY' on the left, and a copyright notice '© Copyright 2020 By Socol' on the right.
